DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Ventilating method A: claims 1-6
 - II. Ventilating method B: claims 7-10
 - III. Ventilating method C: claim 11
 - IV. Ventilating method D: claim 12
 - V. Ventilating method E: claims 13-14
 - VI. Ventilating method F: claims 15-17
 - VII. Ventilating method G: claims 18-21
 - VIII. Ventilating method H: claims 22-25
 - IX. Ventilating method A: claims 38-43
 - X. Ventilating method B: claim 44
 - XI. Ventilating method C: claim 45
 - XII. Ventilating method D: claim 46
 - XIII. Control device A: claims 26-29
 - XIV. Control device B: claims 30-35
 - XV. Control device C: claim 36
 - XVI. Control device D: claim 37
 - XVII. Control device E: claim 47

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Groups I-XII and Groups XIII-XVII are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)).

In this case the process as claimed can be practiced by another materially different apparatus such as manufacture preset controller.

3. Inventions Group I to Group XVII are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of any Group has separate utility such as use independently or combine with any other Groups. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 3744

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chen-Wen Jiang whose telephone number is (571) 272-4809.
